

Dear Sir or Ma'am,
The purpose of this note is to express my support for satellite radio--specifically--XM. I understand that the NAB is trying to block weather and traffic updates from being broadcasted to XM users. Clearly the NAB is protecting its traditional AM/FM clients. Perhaps the NAB believes that the AM/FM monopoly will be tarnished by competition from XM. I contend that this is not true! XM is a fine service offering and they cannot be condemned for offering a higher quality product because it may threaten reactionary broadcasters.

As a happy XM customer I respectfully request that you block the NAB. Support open competition!

Mike Zizza
